

ABDUL MUEEZ

Junior Software Engineer | Full-Stack Developer

Beruwala, Sri Lanka | +94 76 172 2165 | abmueez593@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (BSc Hons, Sabaragamuwa University of Sri Lanka) with hands-on full-stack development experience from an internship at Hameedia and independent projects across Next.js, the MERN/MENN/PENN stacks, and applied machine learning. Comfortable owning a feature end-to-end, from database schema and REST APIs to responsive, real-time frontends, using TypeScript, PHP, MySQL, PostgreSQL, Prisma, Node.js, Express, MongoDB, React and Angular. Recently extended this into authentication, error monitoring, and data-driven applications with Supabase, Sentry, Python and Scikit-learn, plus cloud/DevOps tooling with AWS and Docker. Looking for a junior software engineering role to keep building practical, scalable products.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, PHP, C, C#

Frontend: Next.js, React.js, Angular, HTML5, CSS3, Tailwind CSS, Zustand

Backend: Node.js, Express.js, Django, Laravel, REST APIs, JWT, Socket.io, Zod

Database & ORM: MySQL, PostgreSQL, MongoDB, Prisma, Supabase

ML / Data: Python, Pandas, NumPy, Scikit-learn, Streamlit

DevOps & Monitoring: AWS, Docker, Sentry

Tools & Concepts: VS Code, Jupyter Notebook, Git, GitHub, OOP, Data Structures & Algorithms, Agile

WORK EXPERIENCE

Full-Stack Developer Intern – Hameedia (Private) Limited | April 2026

- Developed a PHP & MySQL Order Management System connecting the Head Office and branches to streamline order creation, tracking, and fulfillment across retail operations.
- Designed relational database schemas and RESTful endpoints in PHP to support real-time order status updates across multiple branch locations.
- Built an Hourly Production Reporting System using PHP & MySQL to record production output and give management real-time visibility into hourly production performance.
- Created dashboard views and automated reports so supervisors could track production targets against actual output.
- Developed a MERN Stack Project Progress Monitoring System to track and visualize project milestones, tasks, progress status, and overall project performance.
- Implemented RESTful APIs with Node.js and Express.js, and built dynamic React components to visualize project data in real time.

Technologies: React, Node.js, Express.js, MongoDB, PHP, MySQL, JavaScript, HTML, CSS

PROJECTS

Task Tracker – Kanban Task Management – Next.js

- Built a responsive task manager with a three-column Kanban board, task CRUD, priority levels, and due dates.
- Added Supabase authentication, protected routes, dashboard analytics, and overdue-task detection.
- Designed a user-linked Prisma schema backed by PostgreSQL and added Sentry error monitoring.

Technologies: Next.js 16, TypeScript, Tailwind CSS v4, Supabase, PostgreSQL, Prisma 5, Zod, Sentry

Food Delivery LK – Sri Lankan Food Delivery – Next.js

- Built a Sri Lankan food-delivery app with restaurant discovery, cuisine browsing, and delivery-address search.
- Implemented customer and restaurant accounts with signed JWT authentication and protected routes.
- Modeled users, restaurants, and orders in PostgreSQL with Prisma.

Technologies: Next.js 14, TypeScript, PostgreSQL, Prisma, JWT, bcryptjs, Tailwind CSS

Aqua Market – Premium Aquarium Marketplace – Next.js

- Developed a responsive e-commerce platform for aquarium products with product browsing, categories, shopping cart, wishlist, and order management.
- Implemented role-based access for Admin, Staff, and Customers, with an analytics dashboard for managing products and orders.

- Integrated JWT authentication, Zustand state management, and Socket.io for secure access, client-side state, and real-time updates.

Technologies: Next.js, TypeScript, MongoDB, Mongoose, JWT, Tailwind CSS, Zustand, Socket.io, Stripe

MHK Travels – Hajj & Umrah Tour Management Platform – PENN Stack

- Developed a full-stack pilgrimage booking platform for managing Hajj & Umrah packages, customer bookings, and tour information.
- Integrated PayHere payment gateway with advance payment support, enabling customers to securely make online bookings.
- Implemented an admin management system for managing packages, bookings, customers, and payment records.

Technologies: Next.js, React, Node.js, Express.js, PostgreSQL, Tailwind CSS, PayHere

Pharmacy POS & Inventory System – MERN Stack

- Built billing, stock-management and reporting workflows with dashboard metrics, stock-value tracking and expiry alerts.
- Added intelligent product search and authentication-based access control.
- Designed a normalized MongoDB schema and RESTful APIs with Node.js and Express.js to support real-time stock updates.

Technologies: React, Node.js, Express.js, MongoDB, JWT

House Price Prediction – Machine Learning

- Trained a regression model on Sri Lankan property and location data, then wrapped it in an interactive Streamlit app for live predictions and data insights.
- Performed data cleaning, feature engineering, and exploratory analysis using Pandas and NumPy to improve model accuracy.
- Evaluated multiple regression algorithms with Scikit-learn and tuned hyperparameters to select the best-performing model.

Technologies: Python, Pandas, NumPy, Scikit-learn, Streamlit

EDUCATION

BSc (Hons) in Computer Science and Technology | 2022 – 2026

Sabaragamuwa University of Sri Lanka

G.C.E. Advanced Level – Physical Science Stream | 2020

Combined Maths: B, Chemistry: C, Physics: S
